

Model 640M Indicator

The Model 640M indicator is a compact Gross/Tare/Net weight indicators which include 1.1" (2.7 cm) LCD alpha-numeric display, with bright yellow green adjustable backlighting for easy viewing regardless of lighting conditions. Operates from 12VDC source and has selectable weight filtering, 100 accumulator memory channels, with individual statistics (count, total, and average weight accumulated) with alpha-numeric identification of those channels. Ideal for such applications as identifying field plots, seed types, recipes, and livestock pens or animals. Options included RAM mount, RS-232 serial port, RD40/RD40XL remote display output, wireless RD40RF output, and connector options.
