

About WTCommScl Test Program Source

The **WTCommScl Test Program** is used to verify the proper installation and operation of the WTCommScl ActiveX Control with your Model 7010 scale. As a courtesy to its customers, Avery Weigh-Tronix provides the complete source code used to build the test application.

Developers can refer to the sample source code for tips on how to access the ActiveX control when building their own application.

Weight:		Status: Scale Op	NORMAL
Raw	01051		NORTEL
Formatted	01:05-1/4	Connection	ONLINE
Net	1.3281	Serial Port	4
Vet Weight Units:		Notification	
Pounds Ounces		Everytime weight received.	
🗑 Kilograms 🛛 Grams		Only when weight changes.	

Please see the PROGRAMMERS NOTES section in the MAIN.cs file for more details.

Scale drivers are located <u>here</u> at the Salter Brecknell website.
